

INDEX

- Adrenal cortico-genital syndrome, and a comparison with that of the pituitary basophilic, 29; clinical conditions common to both, 31.
- Alkalis, some observations on the aetiology and effect of, on the nephrotic syndrome, 1.
- Asthma, hypochlorhydria in, with special reference to the age incidence, 397.
- Auricular component of the first heart-sound, 139.
- Auricular systole, sounds and murmurs produced by, 139.
- Blood in malignant hypertension, an attempt to demonstrate a pressor substance in, 179.
- Blood pH and lactic acid in different types of heart disease, 407.
- Blood-serum, effect of iodide upon the Wassermann reaction of, 263.
- Chicken-pox, tuberculin allergy in, 217.
- Diabetes mellitus, a comparison of various diets in the treatment of, 277.
- Diabetic coma, secretion of urine in, 53.
- Diets of rheumatic families, 228.
- Diets, various, a comparison of, in the treatment of diabetes mellitus, 277.
- Diphtheria, tuberculin allergy in, 218.
- Gallop rhythm, 149; types of triple rhythm, 149; physical basis of, 156.
- Haemochromatosis, 121; content of the tissues in iron and sulphur, 121; results of spectrographic examination with especial reference to copper and calcium, 125.
- Heart disease, different types of, blood pH and lactic acid in, 407.
- Hypertension, malignant, an attempt to demonstrate a pressor substance in the blood in, 179.
- Hypochlorhydria in asthma, with special reference to age incidence, 397.
- Hysterias, conversion, 429.
- Iodides, observations on the therapeutic use of, 247; intolerance to, 254; effect of, on *T. pallidum* and the primary chancre, 256; effect of, on secondary manifestations, 256; action of, on tertiary skin and subcutaneous manifestations, 257; effect of, on certain other tertiary symptoms and signs, 262; effect of, in latent syphilis, 262; effect of, on the Wassermann reaction of the blood-serum, 263.
- Iodism, 254.
- Lactic acid, and blood pH, in different types of heart disease, 407.
- Laurence-Moon-Biedl syndrome, 93.
- Lipoid-granulomatosis with defects in the bones, exophthalmos, and diabetes insipidus, 37.
- Lymphogranuloma, primary, of the stomach, 81.
- Manifestations, secondary, effect of iodide upon, 256.
- Manifestations, subcutaneous, action of iodide on, 257.
- Measles, tuberculin allergy in, 205.
- Mitral stenosis, crescendo murmur of, 142.
- Neoplasia, intrathoracic, incidence of, in the teaching hospitals of Great Britain 1894-1928, 321.
- Nephrotic syndrome, some observations on the aetiology and effect of alkalis on, 1.
- Neuroses, some types of respiration in, 427; anxiety neuroses, 427; conversion hysterias, 429; incidence of respiratory neurosis, 430.
- Nitrogen, non-protein, with the plasma proteins, and the sedimentation rate in chronic rheumatic disorders, 269.
- Obesity, hypogenitalism, mental retardation, polydactyly, and retinal pigmentation: the Laurence-Moon-Biedl syndrome, 93.
- pH, blood, and lactic acid in different types of heart disease, 407.
- Parathyroid hormone in man, influence of infection on the action of, 131.
- Pellagra, secondary, 191.
- Pituitary basophilic syndrome and the adrenal cortico-genital syndrome, a comparison of, 23; clinical conditions common to both, 31.
- Pressor substance in the blood in malignant hypertension, an attempt to demonstrate a, 179.

- Proteins, plasma, and non-protein nitrogen, and the sedimentation rate, in chronic rheumatic disorders, 269.
- Pseudo-haemophilia, hereditary, 165.
- Respiration, some types of, in the neuroses, 427; anxiety neuroses, 427; conversion hysterias, 429; incidence of the respiratory neurosis, 430.
- Rheumatic disease, juvenile, a dietetic study of cases of, 227; diets of rheumatic families, 228; actual consumption of food by rheumatic children compared with that of non-rheumatic and control children; and also compared with that of the rheumatic and control families, 236; comparison of the diets of rheumatic families and rheumatic children with those of children in Poor-Law Institutions and at Christ's Hospital, 238.
- Rheumatic disorders, chronic, the plasma proteins and non-protein nitrogen, and the sedimentation rate in, 269.
- Rheumatic families, diets of, 228; actual consumption of food by rheumatic children compared with, 236; comparison of the diets of, with those of children in Poor-Law Institutions and at Christ's Hospital, 238.
- Scarlet fever, tuberculin allergy in, 214.
- Schüller-Christian syndrome, 37.
- Sedimentation rate in chronic rheumatic disorders, 269.
- Skin lesions, tertiary syphilitic, action of iodide on, 257.
- Skin reactivity to glycerinated veal broth and its bearing on the specificity of the tuberculin reaction, 417.
- Sounds and murmurs produced by auricular systole, 139; auricular component of the first heart-sound, 139; crescendo murmur of mitral stenosis, 142.
- Steatorrhoea, idiopathic, ten cases of, 359; flat blood-sugar curve, 367; basal metabolism, 369; calcium metabolism, 370; anaemia, 372; hypotension, 374; pigmentation, 375; stomatitis, 376; avitaminosis, 376; megacolon, 378.
- Stomach, primary lymphogranuloma of, 81.
- Sugar tolerance in obese subjects, 345.
- Syphilis, latent, effect of iodide in, 262.
- T. pallidum*, effect of iodide upon, 256.
- Tetanus, treatment of, 295; rate of disappearance of antitoxin from the blood of four cases of, 305.
- Tuberculin allergy in acute infectious diseases, 203; measles, 205; scarlet fever, 214; chicken-pox, 217; diphtheria, 218; whooping cough, 220.
- Tuberculin reaction, the specificity of, skin reactivity to glycerinated veal broth, and its bearing on, 417.
- Urine, secretion of, in diabetic coma, 53.
- Veal broth, glycerinated, skin reactivity to, and its bearing on the specificity of the tuberculin reaction, 417.
- Wassermann reaction of the blood-serum, effect of iodide upon, 263.
- Whooping cough, tuberculin allergy in, 220.
